About

I am a Full-Stack TypeScript/JavaScript Developer.
As a developer I like to focus on the details and to have control and freedom in my tooling.
I write efficient and Type-safe code, and maintain a healthy balance of KISS and DRY.
I make use of Linters (religiously), and follow functional programming principles (loosely).
I also dabble in design, particularly UI/UX and brand identities.

Strengths:

Eloquence | Problem solving | Self-Motivation | Empathy | Teamwork | Curiosity

Skills

TypeScript	JavaScript	HTML	CSS	React	Electron
React Native	Node.js	Fastify	Express	NestJS	MySQL
SQL Server	MongoDB	SQLite	Sequelize	Prisma	Mongoose
TypeORM	Material UI	jQuery	Bootstrap	Jest	Vitest

Experience

Freelance Developer & Designer — May 2012 - Jan 2023

I have worked on and off as a freelancer since the summer of '12.
I have taken up projects locally as well as on Upwork.
As a developer, I've worked on a variety of web sites and full-stack applications.
I have also worked extensively as a designer, particularly brand design.

NestedLogics
